

FC TOPCUT2016 is a user friendly **self-weeding transfer paper**. Ideal for most oil or oil-less color laser printers. Suitable for **any image**. **Ideal for flat or gradient colors** (screening up to 30%). **Transfers only the toner-colored areas** and gives a **screen print finish**

DESCRIPTION:

Single step self-weeding (No-cut) transfer paper for light colored fabrics

TECHNICAL DATA:

FC TOPCUT2016 is made of a 110 µm, 100 gr/m² **natural paper liner**, a 30 µm **polyolefin layer** and a 3 µm **composite polymer finish**.

EQUIPMENT:

Color laser printer or copy machine + heat press

APPLICATIONS:

Cotton and other colored natural and synthetic fabrics. Ideal for t-shirts, shoppers bags and other fabric objects.

INSTRUCTIONS:

Insert the transfer paper in the **printer's by-pass** and set to extra heavy printing mode (121-188 g/m²). Print in **mirror mode**.

Place the fabric on the press and **pre-press** for 5 seconds

Method 1:

Place the printed side of the transfer paper on the fabric.

Protect the transfer paper with a layer of the white **TOPCUT polyester cloth** (included in the box).

Method 2:

Place the printed side of the transfer paper on the fabric.

Protect the transfer paper with a **teflon sheet**.

Pneumatic or manual press:

175°C/350°F for 20-25 seconds - pressure 4 atm / medium-high

Method 1:

Wait 5-6 seconds and remove the paper liner starting from the bottom (as the fibres on t-shirts are usually less stretchable in this direction).

Method 2:

Wait 10-12 seconds and remove the paper liner starting from the bottom (as the fibres on t-shirts are usually less stretchable in this direction).

To **ensure perfect color penetration** in the fabric and the **better washing resistance** it is fundamental to place the glossy side of the included **AU CFC POLSIL plastified silicon paper** on the printed fabric and press:

Pneumatic or manual press: 175°C/350°F for 35 seconds - pressure 5 atm / high

Check if the transfer is suitable for your laser printer. Printed garment is machine washable at 40°C. Wash and iron inside-out or protect to keep colors bright. Do not use on wide woven fabrics. For further information contact your dealer.

Store in a cool dry place. Do not expose to direct sunlight. If properly stored the product will maintain its features for at least 2 years.

The instructions on this sheet are merely indicative and contain details concerning tests carried out in our laboratories with our equipment. Do your own testing. The manufacturer will replace defective material but is not responsible for any damage resulting from incorrect use.

* Available in 100 letter sheet boxes or 50 legal sheet boxes.

In every box and for each size a white polyester cloth is included plus 10 sheets of plastified silicon paper.
